B Papers and Articles Without Recognized Concepts

This section lists papers and articles for which we have a pdf local copy, but where we were not able to extract any of the defined concepts. This can basically have two reasons. We either have included a paper which is not at all related to rostering, so that none of the defined concepts occur in the paper. A more likely cause is that the pdf file is a scanned document for which optical character recognition was not run or not successful, so that the pdf consists of a series of bitmap images. In that case, pdfgrep is unable to find any text in the document, and no matches for concepts are found. It may be useful to check the pdf files to see if that is the case.

B.1 Irrelevant Work Suspects

The works in the following table might be irrelevant, as their computed relevance for the body text is very low. Works that do not have a local copy or that only are one or two pages long are excluded from this analysis.

B.2 Works with Few Extracted Concepts

These works do match only few concepts, they might be discussing other topics that should be included in the list of concepts, or they might be irrelevant, and included in the survey by mistake.

C Unmatched Concepts

This section lists those concepts for which no matches were found. The most likely cause is a mistake in the regular expression used to find the concept, but it is also possible that some concept simply is not mentioned in any of the documents.

Table 29: Unmatched Concepts

Key Source	Authors	Title (Colored by Open Access)	Details LC	Cite	Year	Conference /Journal /School	Pages	Relevance	Cites OC XR SC	Refs OC XR	Links Cites Refs
Eldharif2024 Eldharif2024	E. A. Eldharif, O. M. Sallabi, A. A. M. Eltharif	An Improved Genetic Algorithm Tool for Exam Timetabling Solutions	Details Yes	[704]	2024	unknown 2024	6	1.00 1.00 2.62	0 0 1	0 0	0 0 0
Galadkov2024 Galadkov2024	A. Galadíková, B. Časnocha	Using simulated annealing for personnel assignment in railway nodes	Details Yes	[790]	2024	unknown 2024	6	1.00 1.00 1.44	0 1 0	0 20	0 0 0
Mixer2024 Mixer2024	M. Mixer, S. Morrow, L. Sukherman	Two genetic algorithms for final exam scheduling	Details Yes	[1516]	2024	unknown 2024	5	1.00 1.00 2.42	0 0 0	0 17	0 0 0
Moreira2024 Moreira2024	Éber J. B. Moreira, Sergio Antonio Andrade De Freitas	A CP-SAT Approach for Academic Resource Timetabling in Higher Education Institutions: A Case Study at a Major Public University	Details Yes	[2575]	2024	unknown 2024	8	1.00 1.00 7.67	0 0 0	0 33	0 0 0
Pratama2024 Pratama2024	A. N. Pratama, E. N. Alam, S. Suakanto	Optimizing Practical Room Scheduling Using Genetic Algorithms: A Timetabling Case Study at Telkom University	Details Yes	[1742]	2024	unknown 2024	6	1.00 1.00 2.69	0 0 0	0 18	0 0 0
Yang2024b Yang2024b	M. Yang, Z. Wang, X. Wu, D. Shang, S. Su	Integrated Train Timetable Rescheduling After Large-Scale Events for Minimizing Passenger Waiting Time in Metro System	Details Yes	[2359]	2024	unknown 2024	6	1.00 1.00 2.77	0 0 0	0 21	0 0 0
Yao2024a Yao2024a	J. Yao, R. Su, C. Tan	An Integrated Timetable Optimization and Automatic Guided Vehicle Dispatching Method in Smart Manufacturing	Details Yes	[2381]	2024	unknown 2024	6	1.00 1.00 2.72	0 0 0	0 18	0 0 0
Abdipoor2023 Abdipoor2023	S. Abdipoor, R. Yaakob, S. L. Goh, S. Abdullah, K. A. Kasmiran, H. Hamdan	International Timetabling Competition 2019: A Systematic Literature Review	Details Yes	[20]	2023	unknown 2023	6	3.00 3.00 6.67	2 3 3	22 34	15 1 14
Adesola2023 Adesola2023	F. Adesola, O. Adeyinka, A. Kayode, A. Ayodele	Implementation of University Course Time-tabling system using Iterative Forward Search Algorithm	Details Yes	[49]	2023	unknown 2023	4	1.00 1.00 3.39	0 0 0	1 16	1 0 1
Cai2023 Cai2023	Z. Cai, J. Zhang, B. Han, Y. Bao, X. Liu, H. Zheng	Maintenance Scheduling Optimization for AC-DC Grid Based on Component Status under N-1 Contingencies	Details Yes	[405]	2023	unknown 2023	7	1.00 1.00 3.91	1 0 1	16 18	3 0 3
Coviello2023 Coviello2023	N. Coviello, G. Medeossi, T. Nygreen, P. Pellegrini, J. Rodriguez	Integrated Ant Colony Optimization and Mixed Integer Linear Programming for Multi-objective Railway Timetabling	Details Yes	[563]	2023	unknown 2023	7	1.00 1.00 7.15	0 0 0	0 22	0 0 0
Ding2023 Ding2023	M. Ding, Y. Wang, Y. Zhou, K. Zhao, S. Zhu, K. M. Thywoo	Collaborative Optimization of Train Timetable and Train Formation Plan Combined with Passenger Flow Control Strategy	Details Yes	[648]	2023	unknown 2023	6	1.00 1.00 1.53	0 0 0	0 14	0 0 0
Haleel2023 Haleel2023	A. J. Haleel, L. M. Dawood	Maintenance Scheduling Optimization using Artificial Intelligence Techniques: A Review	Details Yes	[902]	2023	unknown 2023	6	2.00 2.00 9.30	1 2 2	41 57	17 0 17
Heiniger2023 Heiniger2023	N. Heiniger, G. Massaro, T. Hanne, R. Dornberger	Solving the Nurse Scheduling Problem in Crisis Situations Applying a Genetic Algorithm	Details Yes	[943]	2023	unknown 2023	7	1.00 1.00 0.48	0 2 2	0 20	0 0 0
Huang2023a Huang2023a	S. Huang, T. Wang, Z. Zhang, L. He	Analyzing Hierarchical Organizational Structure Change: Strategic Planning Model from Personnel Perspective	Details Yes	[999]	2023	unknown 2023	6	1.00 1.00 3.17	0 1 0	13 23	2 0 2
Hurmuzi2023 Hurmuzi2023	A. Hurmuzi, A. Kubaji, W. Hamdoon, Z. Makki, M. Azeez, B. Denizhan	Course Timetabling for Distance Learning Program at SKU Using Genetic Algorithm	Details Yes	[1010]	2023	unknown 2023	7	1.00 1.00 2.20	0 0 0	6 10	1 0 1
Ibrahim2023 Ibrahim2023	R. Ibrahim, M. Sithambrathan, K. Mohan, R. D. David, J. A. Wahab	Exam scheduling system using graph coloring algorithm	Details No	[1020]	2023	unknown 2019	null	1.00 1.00 n/a	0 0 0	12 16	6 0 6

Imawan2023 Imawan2023	R. Imawan, F. N. Abraham, N. H. N. Budhiman, Justisia Queenada Raudhatul Adelia Sutopo, M. R. R. Nugraha	Mathematical model and simulation for timetabling in mathematics Department of Bandung Institute of Technology	Details No	[1023]	2023	unknown 2019	null	1.00 1.00 n/a	0 0 0	5 15	3 0 3
Liu2023a Liu2023a	Y. Liu, X. Chen, Y. Xu, D. Xiang, L. Mo	Accelerating Model Solving for Integrated Optimization of Timetabling and Vehicle Scheduling based on Graph Convolutional Network	Details Yes	[1369]	2023	unknown 2023	7	2.00 2.00 3.55	0 0 0	0 21	0 0 0
Makarova2023 Makarova2023	I. Makarova, G. Mavlyautdinova, V. Mavrin, P. Buyvol, A. S. Alatrany, J. Mustafina	Improvement of the Personnel Delivery System in the Mining Complex using Simulation Models	Details No	[1425]	2023	unknown 2023	null	2.00 2.00 n/a	0 0 1	0 48	0 0 0
V.2023 V.2023	L. V., M. K., S. A., Y. G.	Automating Timetable Generation with Conflict Resolution Algorithms in Web-Based Systems for Educational Institutions	Details Yes	[2176]	2023	unknown 2023	4	1.00 1.00 2.40	0 3 2	0 7	0 0 0
Wu2023a Wu2023a	Y. Wu, Z. Ying, H. Wang, X. Wang	A Train Timetabling Optimization Method for Mixed Passenger and Freight Railway Transportation under the Prohibiting Meeting Requirement in the Section	Details No	[2303]	2023	unknown 2023	null	1.00 1.00 n/a	0 2 2	0 16	0 0 0
Austero2022 Austero2022	L. D. Austero, A. M. Sison, J. B. Matias, R. P. Medina	Solving course timetabling problem using Whale Optimization Algorithm	Details Yes	[193]	2022	unknown 2022	7	1.00 1.00 3.52	2 2 4	28 34	9 0 9
Chaudhari2022 Chaudhari2022	Y. S. Chaudhari, V. W. Dmello, S. S. Shah, P. Bhangale	Autonomous Timetable System Using Genetic Algorithm	Details No	[477]	2022	unknown 2022	null	2.00 2.00 n/a	0 1 1	14 30	1 0 1
Chen2022c Chen2022c	M. C. Chen, S. N. Sze, S. L. Goh, S. P. Lau	Investigation of Heuristic Orderings with a Perturbation for Finding Feasibility in Solving Real- World University Course Timetabling Problem	Details Yes	[487]	2022	unknown 2022	6	1.00 1.00 3.32	0 1 2	17 16	10 0 10
Fong2022 Fong2022	C. W. Fong, H. Asmuni, P. H. Leong, Y. H. Sam, Y. Y. Pang, H. M. Sim	Zombie Survival Optimization in Solving University Examination Timetabling Problem	Details Yes	[762]	2022	unknown 2022	5	2.00 2.00 4.75	0 1 2	18 21	10 0 10
Galadkov2022 Galadkov2022	A. Galadříková, N. Adamko	Simulation-based optimization of personnel assignment in railway nodes	Details No	[788]	2022	unknown 2022	null	1.00 1.00 n/a	2 3 3	22 27	3 2 1
Hasani2022 Hasani2022	M. Hasani, M. K. Sheikh-El-Eslami, H. Delkhosh	A Linear Model for Wind Farms Preventive Maintenance Scheduling Considering the Wind Speed Uncertainty and Electricity Market Conditions	Details Yes	[925]	2022	unknown 2022	7	1.00 1.00 1.18	0 0 1	15 17	3 0 3
Li2022g Li2022g	J. Li, H. Dong, X. Zhao, L. Tao, C. Liang, Y. Zhang	Practical bus timetable optimization method based on deep reinforcement learning	Details No	[1273]	2022	unknown 2022	null	1.00 1.00 n/a	1 1 1	16 20	4 0 4
Liu2022 Liu2022	Y. Liu, L. Zhou, L. Cuthbert	Re-sit Exam Timetabling System using a Tailored Genetic Algorithm	Details No	[1372]	2022	unknown 2022	null	2.00 2.00 n/a	0 0 0	5 10	4 0 4
Mohammed2022 Mohammed2022	M. F. Mohammed, R. A. Abobaker, A. M. Aljalil, A. M. Maatuk	Examinations Timetabling System Based on A Genetic Algorithm	Details Yes	[1522]	2022	unknown 2022	6	2.00 2.00 6.73	0 1 1	24 43	14 0 14
Muklason2022 Muklason2022	A. Muklason, B. A. Nugroho, E. Riksakomara, R. Tyasnurita, F. Mahananto, R. A. Vinarti, M. A. Nuriman	Flexible Automated Course Timetabling System with Lecturer Preferences Using Hyper-heuristic Algorithm	Details No	[1549]	2022	unknown 2022	null	2.00 2.00 n/a	0 1 2	10 18	7 0 7

Premananda2022 Premananda2022	I. G. A. Premananda, A. Tjahyanto, A. Muklason	Hybrid Whale Optimization Algorithm for Solving Timetabling Problems of ITC 2019	Details Yes	[1745]	2022	unknown 2022	6	1.00 1.00 2.76	2 3 6	21 23	10 2 8
Siew2022 Siew2022	S. K. E. Siew, S. N. Sze, K. L. Goh, J. J. Wong	Grouping and Heuristics for A Multi-stage Class Timetabling System	Details Yes	[2001]	2022	unknown 2022	6	1.00 1.00 5.21	1 2 2	18 18	12 1 11
Wong2022 Wong2022	C. H. Wong, S. L. Goh, J. Likoh	A Genetic Algorithm for the Real-world University Course Timetabling Problem	Details Yes	[2276]	2022	unknown 2022	5	1.00 1.00 3.13	9 12 15	16 22	14 2 12
Huang2021c Huang2021c	P.-Y. Huang, C.-C. Kung, C.-W. Lin	An Integrated Formulation and Optimization for Periodic Timetabling of Railway Systems	Details No	[997]	2021	unknown 2021	null	2.00 2.00 n/a	1 2 2	14 20	5 0 5
Khan2021 Khan2021	M. K. Khan, H. Takeuchi, M. Ohki	An Experimental Application of Multi-Objective Evolutionary Algorithm to Many-Objective Nurse Scheduling for Real General Hospitals	Details Yes	[1130]	2021	unknown 2021	4	1.00 1.00 0.35	3 3 4	7 7	2 0 2
Klimov2021 Klimov2021	D. Klimov, M. Rabovskaya, V. Kozlov, A. Syskov	Timetable Model For Self Regulated Learning Based On Student Agent Level Restrictions Resolving	Details No	[1149]	2021	unknown 2021	null	1.00 1.00 n/a	0 0 0	15 15	3 0 3
Li2021 Li2021	J. Li, Y. Cheng, T. Wang, H. Wang	PLEAS: A Decision Support System for Personnel Evaluation and Selection	Details No	[1272]	2021	unknown 2021	null	1.00 1.00 n/a	0 0 0	19 21	1 0 1
Ngo2021a Ngo2021a	S. T. Ngo, J. Jafreezal, G. H. Nguyen, A. N. Bui	A Genetic Algorithm for Multi-Objective Optimization in Complex Course Timetabling	Details No	[1595]	2021	unknown 2021	null	2.00 2.00 n/a	11 10 12	8 19	6 1 5
Rane2021 Rane2021	M. V. Rane, V. M. Apte, V. N. Nerkar, M. R. Edinburgh, K. Y. Rajput	Automated Timetabling System for University Course	Details Yes	[1799]	2021	unknown 2021	7	2.00 2.00 2.14	7 10 9	6 14	6 2 4
Singh2021 Singh2021	H. Singh, R. Sibal, S. Tyagi	GATT: A Genetic Algorithm-based Tool for Automating Timetable Scheduling at Netaji Subhas University of Technology	Details No	[2010]	2021	unknown 2021	null	1.00 1.00 n/a	0 0 0	8 14	4 0 4
Wang2021c Wang2021c	M. Wang, X. Chen, J. Yin, S. Su, D. Andrea, Y. Wang, T. Tang	A Bi-Objective Optimization Model for Coordinated Train Timetabling in Rail Transit Networks	Details No	[2221]	2021	unknown 2021	null	2.00 2.00 n/a	1 1 2	15 16	4 0 4
Wongborwornsarsawat2021 Wongborwornsarsawat2021	S. Wongborwornsarsawat, W. Kanokbannakorn	The Long-Term Maintenance Scheduling in Distribution System: PEA Case Study	Details No	[2279]	2021	unknown 2021	null	1.00 1.00 n/a	1 1 1	6 14	1 0 1
Zhou2021b Zhou2021b	T. Zhou, J. Chen, Y. Xu, B. Xiao	Application of Multi-objective Genetic Algorithm in Personnel Scheduling among Warehouses	Details No	[2537]	2021	unknown 2021	null	1.00 1.00 n/a	0 1 1	10 12	1 0 1
Syskov2020 Syskov2020	A. Syskov, M. Rabovskaya, V. Makhneva	Timetable Model for Individualization of Education Based on Multi-agent Approach	Details Yes	[2080]	2020	unknown 2020	4	1.00 1.00 2.99	1 1 2	13 14	8 1 7
Unprasertporn2020 Unprasertporn2020	T. Unprasertporn, D. Lohpetch	An Outperforming Hybrid Discrete Particle Swarm Optimization for Solving the Timetabling Problem	Details No	[2171]	2020	unknown 2020	null	1.00 1.00 n/a	4 4 7	18 23	14 2 12
Wu2020 Wu2020	L. Wu, D. Li, X. Dong	Optimization for Regional Railway Transit Timetabling Based on Fairness of Different Stations	Details No	[2289]	2020	unknown 2020	null	1.00 1.00 n/a	0 0 1	5 0	1 0 1
Xu2020 Xu2020	W. Xu, B. Xie, X. Zhang, L. Ning	Last-Train Timetable Optimization and Rescheduling Considering Transfer Demand	Details No	[2330]	2020	unknown 2020	null	1.00 1.00 n/a	0 0 0	11 0	3 0 3

---------------	---------	--------------------------------	---------------	------	------	-----------------------------------	-------	----------------	----------------------	------------------	------------------------

I Most Similar Works

The following table shows the most similar works for each work. The first line shows the five works most similar by references and citations, the second line shows the similarity by Euclidean distance of the feature vectors. The next two entries are based on the dot product similarity, resp. the cosine similarity. Note that the first two entries will have low values for similar items, as they are based on distance. The last two entries use high values for similar items, as they use a similarity value, not a distance.

Fewer than five entries are shown if no similar entries are found. Colour coding is based on percentiles (80, 90, 95, 98, 99, 99.5 percentiles for similarity, 20, 10, 5, 2, 1, 0.5 percentiles for distance) of all similarity values found.

I.1 Most Similar Works Based on Euclidean Distance

The following tables show pairs of work for which the similarity by concept value is smallest. This allows to check if the measure is really finding similar papers.

One of the challenge of this similarity measure is that works with few extracted features are considered to be quite similar. This should not be the case.

Table 836: Works Close by Euclidean Distance (Total 40)

Key Source	Authors	Title (Colored by Open Access)	Details LC	Cite	Year	Conference /Journal /School	Pages	Relevance	Cites OC XR SC	Refs OC XR	Links Cites Refs

Table 839: Features of Works Similar by Dot Product

Work/Title	Pages	Relevance	Rostering	CP
Ernst2004a [719] Details An Annotated Bibliography of Personnel Scheduling and Rostering	124	2.00 2.00 970.42	rostering, personnel, Nurse Scheduling, staff scheduling, Nurse Rostering, workforce scheduling, time-tabling, timetable, Scheduling staff, workforce allocation, automated timetabling, Scheduling for nurses	model, system, column generation, optimization, integer programming, bibliography, review, genetic algorithm, constraint programming, mathematical programming, local search, goal programming, tabu search, CLP, simulated annealing, constraint logic programming, metaheuristics, package, evolutionary algorithm, developments, survey, constraint satisfaction, MILP, introduction, propagation, hyper heuristics, benchmark, CP, state of the art, competition, research directions, memetic algorithm, memetic approach, MIP, CSP, constraint propagation, constraint optimization
Lewis2007 [1252] Details A survey of metaheuristic-based techniques for University Timetabling problems	24	2.00 2.00 73.44	time-tabling, timetable, automated timetabling, university timetabling, examination timetabling, school timetabling, Timetable construction, examination scheduling, rostering, school timetable	optimization, survey, competition, metaheuristics, tabu search, simulated annealing, genetic algorithm, review, local search, system, benchmark, evolutionary algorithm, integer programming, introduction, hyper heuristics, constraint programming, model, constraint logic programming, memetic algorithm, hybrid algorithm, memetic approach, algorithmic strategies, research directions, developments

I.3 Most Similar Works Based on Cosine Similarity

As before, but now based on the cosine similarity measure. A high value means that works are similar.

Table 840: Works Similar by Cosine Similarity (Total 40)

K Highly Connected Missing Works

The following table shows work currently not considered which are highly connected to the survey, but which do not have a high enough relevance to be included automatically. The top 50 entries are shown. Some of these work may be background material cited by many works in the survey, or we might be missing some concepts to show that they are relevant to the survey topic.

Table 843: Highly Connected Missing Work Not Considered Relevant (Total 41877 Works Checked, 50 Selected)
